Dr. Brenda Jensen, Associate Professor of Biology and Associate Dean of the College of Natural and Computational Sciences at Hawai‘i Pacific University will discuss the diversity and unique ecology of the whales and dolphins found in Hawai‘i. Dr. Jensen will present her team’s recent findings and ongoing research measuring persistent organic pollutants and marine debris in marine mammals as well as evidence for impacts of contaminants on whale and dolphin health.

**Monday 22nd April, 2013**

**6:30pm - 8:00pm**
