

Beach Environmental Awareness Campaign Hawai'i and Ecology Club UHM present a

Free lecture – open to the public

“Assessing the Toxicity of Plastic Marine Debris and Harm to Marine Life”

photo: © Suzanne Frazer

Dr. Magnus Engwall, Professor of Ecotoxicology at Örebro University Sweden and currently a visiting professor at U.C. Davis Department of Environmental Toxicology, will speak about his research into the issue of POPs and what he has found in his investigation of plastic marine debris from Hawai'i's beaches. He will share recent findings from using new methods to detect toxic compounds on plastic marine debris and assess the risk of these chemicals to ecosystems.

Monday 29th April, 2013

6:30pm - 8:00pm

UHM Architecture auditorium
